

7 Excel Automations That Save 20+ Hours Per Week

****Free Instant Download****

By ExcelAutomate.pro – Excel Automation Expert

1. **Auto-Refresh Power Query Dashboard**

****Before**:** 3 hours copying CSVs into Excel

****After**:** Live data pulls from folder, API, or database — updates in 10 seconds

***Use case*:** Sales, inventory, or finance reporting

2. **One-Click VBA Report Generator**

****Before**:** 6 hours of manual formatting every month

****After**:** Click one button → PDF report emailed automatically

***Use case*:** Monthly close, board reports

3. **Dynamic Cost Tracker (12 Regions)**

****Before**:** Copy-paste across 12 tabs → errors everywhere

****After**:** One master file auto-rolls up all regions

***Use case*:** Construction, retail chains

4. **Amazon FBA Sales Dashboard**

****Before**:** Export CSV → clean → pivot → repeat

****After**:** Drag new CSV → dashboard updates instantly

***Use case*:** E-commerce sellers

5. **Finance Team Monthly Close**

****Before**:** 3 days of reconciliation hell

****After**:** 30-minute automated close with audit trail

***Use case*:** Accounting teams

6. **Smart Conditional Formatting Alerts**

****Before**:** Manually scan for overdue items

****After**:** Red flags appear automatically - never miss a deadline

***Use case*:** Project management, invoicing

7. **Email → Excel Auto-Logger**

****Before**:** Copy data from emails into spreadsheets

****After**:** Forward email → data logged with timestamp

***Use case*:** Support tickets, expense tracking
